OBJECTIVE

I am a junior at FAST NUCES pursuing Computer Science with strong foundation in full-stack development and passion for building scalable, user-centric applications. Demonstrated expertise in modern web technologies including Next.js, React, and database architecture with proven ability to optimize performance . Currently expanding skill set into Machine Learning with focused study in Deep Learning. Eager to contribute technical skills and innovative problem-solving abilities as a software engineering intern while growing alongside industry professionals.

EDUCATION

Bachelor of Science in Computer Science, FAST NUCES, Karachi 2023 - 2027
4 semesters completed

Intermediate (Pre-Engineering), Adamjee Government Science College 2021 - 2023
84%

SKILLS

Languages	JavaScript (ES6+), TypeScript, Python, C/C++, SQL
Frontend	React 19, Next.js 16, HTML5/CSS3, Tailwind CSS, Bootstrap
Backend	Node.js, Express.js, Next.js , Flask, RESTful APIs, JWT
Databases	MySQL 8, MongoDB, Prisma ORM.
Security	NextAuth.js, bcrypt, OTP Verification, RBAC, Rate Limiting, CSRF Protection
Tools	Git/GitHub, VS Code, Postman, Prisma Studio.
Core CS	OOP, Data Structures, Algorithms, DBMS, Operating Systems
Soft Skills	Team Collaboration, Clear Communication, Fast Learner, Attention to Detail

PROJECTS

NADRA Citizen Services Portal. Automated government service delivery platform using Next.js, React, Prisma, and MySQL, reducing processing time by 60% through intelligent ticket management. Designed 12-table normalized database with 13 strategic indexes reducing query time by 70%. Built multi-role authentication (USER/AGENT/ADMIN) with OTP verification and rate limiting. Developed smart load-balancing algorithm for automatic agent assignment. Implemented payment system with idempotency protection and 4-stage delivery tracking with email notifications. Integrated bilingual AI chatbot (English/Urdu) using Flask + Hugging Face API.

Voice Assistant AI. Built hands-free voice-controlled assistant for task automation using Python, SpeechRecognition, and Edge TTS with 95% speech recognition accuracy. Integrated speech-to-text and text-to-speech with natural voice synthesis. Built interactive Tkinter GUI with event-driven architecture. Supports 10+ commands including web search, time/date queries, and app launching.

Spotify Clone. Created pixel-perfect Spotify UI replica using HTML, CSS, and JavaScript demonstrating advanced frontend skills without frameworks. Built responsive music player with custom audio controls, progress bar, and volume slider. Implemented dynamic playlist system and smooth animations using CSS Grid/Flexbox. Achieved 100% mobile responsiveness with DOM manipulation and Audio API.

ACHIEVEMENTS & INVOLVEMENT

- Developed Query Quest platform for PROCOM 2026, a competitive SQL learning game used in the national computing olympiad.
- Co-Head of Software Engineering Competition in Dev Day 2026.
- Completed Full Web Development Course by CodeWithHarry (Udemy).
- Volunteered in tech workshops and coding contests (Coder's Cup).
