UMER KHAN

Karachi, Pakistan | +92 330-8696449 | khaankhattack321@gmail.com | linkedin.com/in/umer-khan10 | umer-portfolio-flame.vercel.app

OBJECTIVE

Computer Science undergraduate at FAST NUCES with hands-on experience building full-stack web applications using Next.js, React, and modern database architectures, complemented by recently completed coursework in Artificial Intelligence and Deep Learning. Skilled in designing secure authentication systems, optimizing performance, and shipping production-ready features. Seeking a Software Engineering Internship to contribute technical skills and grow alongside experienced engineers.

EDUCATION

Bachelor of Science in Computer Science — FAST NUCES, Karachi *2023 – 2027 (Expected)*
Completed 6th Semester
Intermediate (Pre-Engineering) — Adamjee Government Science College *2021 – 2023* — 84%

SKILLS

Languages: JavaScript (ES6+), TypeScript, Python, C/C++, SQL
Frontend: React 19, Next.js 16, HTML5/CSS3, Tailwind CSS, Bootstrap, Responsive Design
Backend: Node.js, Express.js, Next.js API Routes, Flask, RESTful APIs, JWT
Databases: MySQL 8, MongoDB, Prisma ORM, Query Optimization, Transactions, Indexing
Security: NextAuth.js, bcrypt, OTP Verification, RBAC, Rate Limiting, CSRF Protection
Tools: Git/GitHub, VS Code, Postman, Prisma Studio, Nodemailer, npm/yarn
Core CS: OOP, Data Structures, Algorithms, DBMS, Operating Systems
AI/ML: Artificial Intelligence Fundamentals, Deep Learning, Neural Networks
Soft Skills: Team Collaboration, Clear Communication, Fast Learner, Attention to Detail

PROJECTS

NADRA Citizen Services Portal

- Automated government service delivery platform (Next.js, React, Prisma, MySQL), reducing processing time by 60% through intelligent ticket management.
- Built multi-role authentication (User/Agent/Admin) with OTP verification, rate limiting, and RBAC.
- Designed a smart load-balancing algorithm for automatic agent assignment and a payment system with idempotency protection.
- Integrated a bilingual (English/Urdu) AI chatbot using Flask and the Hugging Face API.

Voice Assistant AI

- Built a hands-free, voice-controlled task automation assistant (Python, SpeechRecognition, Edge TTS) with 95% speech recognition accuracy.
- Combined speech-to-text and natural text-to-speech with an event-driven Tkinter GUI supporting 10+ voice commands, including web search and app launching.

Spotify Clone

- Built a pixel-perfect Spotify UI replica (HTML, CSS, JavaScript) with a fully responsive music player — custom audio controls, progress bar, and volume slider.
- Implemented a dynamic playlist system and smooth CSS Grid/Flexbox animations, achieving 100% mobile responsiveness via DOM manipulation and the Audio API.

LEADERSHIP & ACHIEVEMENTS

- Co-Head, Software Engineering Competition, Dev Day 2026 — led event coordination and technical evaluation for 100+ participants.
- Developed Query Quest, a competitive SQL-learning platform, for PROCOM 2026.
- Completed the Full Web Development Course by CodeWithHarry (Udemy).
