OBJECTIVE

Computer Science student at FAST NUCES with hands-on experience building production-ready full-stack applications. Proven ability to design scalable databases, implement enterprise authentication, and deliver responsive UIs. Seeking a software engineering internship to contribute to impactful projects using Next.js, React, and modern databases.

EDUCATION

Bachelor of Science in Computer Science
FAST NUCES, Karachi — 2023 to 2027 (4 semesters completed)
Intermediate (Pre-Engineering)
Adamjee Government Science College — 2021 to 2023 (84%)

TECHNICAL SKILLS

Languages: JavaScript (ES6+) • TypeScript • Python • C/C++ • SQL

Frontend: React 19 • Next.js 16 • HTML5/CSS3 • Tailwind CSS • Bootstrap • Responsive Design • SSR

Backend: Node.js • Express.js • Next.js API Routes • Flask • RESTful APIs • JWT • Session Management

Databases: **:** MySQL 8 • MongoDB • Prisma ORM • Query Optimization • Transactions • Indexing

Security: NextAuth.js • bcrypt • OTP Verification • RBAC • Rate Limiting • CSRF Protection

Tools: Git/GitHub • VS Code • Postman • Prisma Studio • Nodemailer • npm/yarn

Core CS: OOP • Data Structures • Algorithms • DBMS • Operating Systems

PROJECTS

- **NADRA Citizen Services Portal | Next.js, React, Prisma, MySQL, NextAuth (View website)**
  Automated government service delivery platform reducing processing time by 60% through intelligent ticket management and agent assignment.

  Features: - Designed 12-table normalized database with Prisma ORM, complex relationships, and cascade operations - Added 13 strategic indexes reducing query time by 70%; used **transactions** to prevent race conditions - Built multi-role authentication (USER/AGENT/ADMIN) with OTP verification, rate limiting, and attempt tracking - Developed smart load-balancing algorithm for automatic agent assignment based on workload capacity - Implemented payment system with idempotency protection supporting online cards and cash-on-delivery - Created priority queue system with auto-refresh and real-time position tracking - Built 4-stage delivery tracking (PENDING → DISPATCHED → IN_TRANSIT → DELIVERED) with email notifications - Integrated bilingual AI chatbot (English/Urdu) using Flask + Hugging Face API for 10+ service categories - Designed 3 role-based dashboards with gradient themes, glassmorphism effects, and 15+ interactive components - Automated email workflows via Nodemailer for ticket updates, assignments, and payment confirmations

- **Voice Assistant AI | Python, SpeechRecognition, Edge TTS, Tkinter**
  Hands-free voice-controlled assistant for task automation with 95% speech recognition accuracy.
  Features: - Integrated speech-to-text and text-to-speech with natural voice synthesis - Built interactive Tkinter GUI with event-driven architecture for asynchronous inputs - Supports 10+ commands including web search, time/date queries, and app launching
- **Spotify Clone (HTML, CSS, JavaScript)**
  Pixel-perfect Spotify UI replica demonstrating advanced frontend skills without frameworks.
  Features: - Created responsive music player with custom audio controls, progress bar, and volume slider - Implemented dynamic playlist system and smooth animations using CSS Grid/Flexbox - Achieved 100% mobile responsiveness with DOM manipulation and Audio API.
- **PassMag – Password Manager (React, Express.js, Tailwind CSS)**
  Secure local-first password management tool with full CRUD operations and responsive design.
  Features: - Built complete CRUD system with real-time UI updates and toast notifications - Implemented password visibility toggle, search/filter, and copy-to-clipboard functionality - Designed mobile-responsive interface using Tailwind CSS and React Hooks for state management - Used Local Storage API for client-side persistence without external dependencies
- **Palindrome Checker (Python, Tkinter)**
  Educational tool with GUI for verifying palindrome strings using recursive and iterative algorithms.
  Features: - Developed case-insensitive checking with input validation and visual feedback - Implemented event-driven programming with color-coded results

ACHIEVEMENTS & INVOLVEMENT

• **Full Web Development Course – CodeWithHarry (Udemy)** *Certificate:* View here
• Volunteered in tech workshops and coding contests (Coder's Cup)
• Self-learning through YouTube

SOFT SKILLS:

Team Collaboration • Clear Communication • Fast Learner • Deadline-Oriented • Attention to Detail
